

Thymogen Alpha-1

A naturally produced peptide that enhances the body's immune responses!

Anti Inflammatory Regulation

Reduces overall inflammation without broadly suppressing immune function! Better than traditional pharmaceutical antibiotics without side effects!

- *Boosts immune cell responsiveness
- *Strengthens the body's capacity to recognize and eliminate infected cells!

Enhanced Immune Surveillance

Powerful immune-modulating peptide that fortifies the adaptive immune system, aids in inflammatory regulation, and can serve as a valuable adjunct in chronic infection therapies!
Helps fight bacteria, viruses,
Mold, fungus, parasites,
And all pathogens!

Contains a synthetic combination of bioregulator dipeptides Thymogen and immune peptide A2 (Lys-Glu) which support a healthy immune system balance.

Ingredients: Thymogen (Glu-Tryp),
Immune Peptide A2 (Lys-Glu)

Also available in injection form under the name Thymosin Alpha-1.

*Thymogen Alpha-1 starting @ \$160, Thymosin Alpha-1 starting @ \$120.

Prices subject to change. *
